SCHOOL PROFILES

SCHOOL PROFILES

Adopted schools

This is a birds-eye summary view of our Whole School Development (WSD) model in action in 166 adopted schools.

Adopted schools are schools supported through the Whole School Development (WSD) model where donors demonstrate sustained commitment to improving school outcomes. A school is considered adopted when it has received leadership development support, benefited from at least two of the three WSD pillars which are infrastructure, curriculum support and social welfare, or where a donor has committed to a long term partnership with the school even if only one component of the WSD model has been implemented. Schools that only receive infrastructure interventions such as the construction or renovation of a science laboratory, computer laboratory, Grade R facility or library together with related resources and training are classified as assisted schools rather than adopted schools.

*Please note: The interventions conducted in the schools adopted through KST are reported on in KST's independent Annual Report.

Description of terms:

Adopter: Companies or individuals who are engaged in school projects on a long-term basis

Previous adopter: Companies or individuals who have previously adopted schools

Additional and current sponsor: Companies or individuals who have made once-off contributions

Previous sponsor: Companies or individuals who have previously made long-term or once-off contributions

Assisted schools

schools are schools that have received once off or ad hoc support through the Adopt a School Foundation but have not yet been adopted under the full Whole School Development model. These schools may have benefited from limited interventions through specific programmes or partners and may still require long term adoption and comprehensive support. Assisted schools may also include schools that have received donations only, such as dictionaries, computers, school furniture, library books or school uniforms, without broader developmental interventions.

Early Childhood Development Centers

In 2024 Adopt-a-School Foundation began working in 14 Early Childhood Development centres in Limpopo, the North West and the Northern Cape. Quality early learning in preschools is fundamental to ensuring children start school on track and have the building blocks to thrive in a formal schooling environment.
