

OUR SCHOOL PROFILES

2017 - 2018

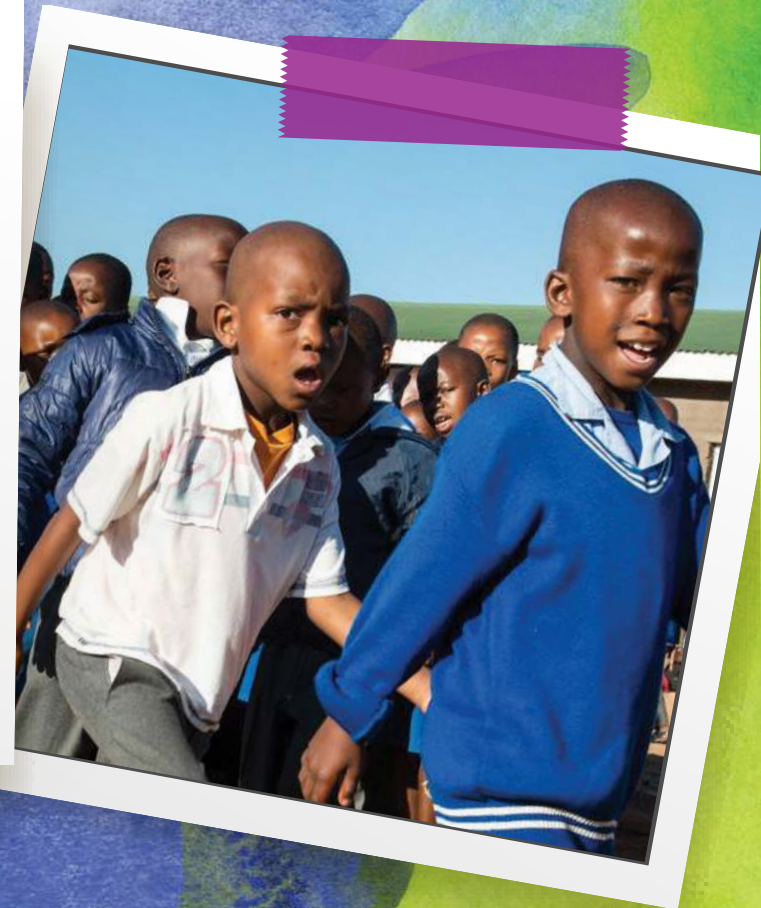

TABLE OF CONTENTS

Adopted Schools	2
Assisted Schools	30
Schools on our Waiting List	56

A young person with dark skin and short hair, wearing red-rimmed glasses and a green sweater with white stripes on the sleeves, is looking down at an open book. The book has a picture of a ship on the left page. A large, yellow, torn-paper-shaped overlay is positioned in the center of the image, containing text. The background is a warm, slightly blurred indoor setting.

SCHOOL PROFILES

This is a birds-eye view of our Whole School Development model in action in the 208 schools that fall directly under the Adopt-a-School Foundation. The interventions conducted in the 240 Free State schools adopted by KST are reported on in their independent Annual Report.

Some of the schools below are under full adoption programmes and some have been adopted for shorter periods of times or given once off assistance. Whole School Development is an on-going process that requires a variety of different interventions to create effective and conducive education environments.

Adopt-a-School Foundation relies on corporate and individual donations to effectively implement Whole School Development in all of the schools in our programme.

PROFILES OF ADOPTED SCHOOLS

Adopted schools include those schools that have current committed supporters and are receiving ongoing support through Adopt-a-School Foundation and schools that have completed a holistic 3 – 5 year Whole School Development investment. All of these schools continue to need further investment and development programmes.
