

Menu of Offerings

This document reflects a sample of Whole School Development (WSD) interventions with estimated costs for implementation. These interventions are based on a high level overview of a school's needs. Costs are subject to changes based on annual material increases, and the location and size of the schools. Once a project or school has been selected, a more comprehensive needs analysis will be undertaken and a funding proposal will be submitted. Funding proposals include all relevant professional fees as well as costs related to project management, health and safety, insurance, travel etc. Costing also includes a contingency fee.

Leadership Delivery

The in-house School Leadership Advancement (SLA) Programme is the first step in the implementation of WSD. It is an ETDP-SETA accredited programme and endorsed by the South African Council for Educators (SACE). The programme seeks to empower the School Governing Body, School Management Team and educators with leadership, business and interpersonal skills. It aims to improve teamwork through building a unified vision and reinforcing goal-driven strategic plans and accountability. The process also includes the development of a strategic action plan for the school and monitoring support for its implementation.

Cost Structure

The costs are inclusive and based on an estimate of 35 participants. The SLA programme starts from ± R394 500 ranging to ± R667 000.

Infrastructure Delivery

The Foundation's community-based infrastructure model empowers small community businesses and creates temporary employment opportunities. Our team comprises of civil engineers, quantity surveyors and quality assurers.

Classrooms, Grade R facilities, ablutions, access to sanitation, electricity and security are the most basic infrastructure requirements. Facilities such as libraries, science labs, ICT centres and sports facilities are critical to delivering quality education and a positive schooling experience.

Cost Structure

Structures start from: ± R554 000 ranging to ± R3 477 000.

Curriculum Delivery

Effective curriculum management, support and implementation requires optimum school functionality. The Foundation's curriculum delivery department focuses on developing educators and supporting learners.

Educator development is offered in gateway subjects such as maths, science, accounting and geography. Other key areas include remedial teaching, counselling skills, library management and sports coaching.

Learner support programmes assists with making subjects engaging and easy to understand. The programme helps learners master the fundamentals to succeed during and after their school career.

Cost Structure

Educator development and learner support programmes start from: ± R450 000 ranging to ± R1 205 000.

Social Welfare Delivery

The social wellbeing of learners and educators is fundamental in supporting effective teaching and learning.

Interventions include health, sanitation and sexual education, audiology and visual support, moral regeneration, assistance with access to social grants, establishing vegetable gardens, running awareness campaigns and providing additional support for orphaned and vulnerable school children.

Cost Structure

Social welfare programmes start from: ± R68 000 ranging to ± R650 000.
